

#491325-V & #491328 Check Valves

303SS BODY/STEM, 1/3LB 316SS SPRING, VITON SEAT, MAX. 5000PSI

#491325-V and #491328 Chemical Check Valves are used in Lafferty pressure washer foamers and sprayers, boosted and high water pressure systems, or when stainless steel and maximum durability are required.

#491325-V

- 1/4" MPT x 1/4", 1/2" Hose Barb
- Hose barb fits 1/4" and 1/2" tubing

#491328

- 1/4" MPT x 1/4" FPT
- Shown in pictures below

#491325-KIT

- Repair kit for #491325-V and #491328
- Includes replacement spring and Viton valve seat

Tips & Tricks

- Ensure check valve is connected in the correct direction (arrow indicates flow)
- For maintenance: disassemble and clean all internal components. Ensure that the small ports are not obstructed.
- To extend the life of the valve seat, it may be possible to flip it over to expose usable surface and allow operation until a repair kit can be procured.
